This product can promote your cardiovascular and cerebrovascular health and improve immune system, is a powerful and natural way to maintain optimal cholesterol levels.

History of Uset

POLYGO-GENX-IV is a "fufang" composed of Solomonseal, Sanchi, Hawthorn, Danshen, Glossy privet fruit .

Traditional Chinese Medicine (TCM) prescriptions has advocated combined therapies through nearly 100,000 compound prescriptions for 2,500 years, usually contain several herbs called a "fufang". This formulation is based on the principle of "Jun-Chen-Zuo-Shi".

"Jun" (emperor) treats the main cause of the disease

"Chen" (minister) enhances the actions of "Jun" or treats accompanying symptoms

"Zuo" (adjuvant) reduces or eliminates possible toxic effects of the Jun or Chen herbs but also treats accompanying symptoms

"Shi" (courier) helps to deliver or guide the other herbs to the target organs.

Principles of Traditional Chinese Medicine

Like drug cocktails in Western medicine, traditional Chinese medicines are usually combination therapies with four well-defined roles for the ingredients.

The roles include the Emperor, Minister, Assistant, and Delivering Servant. While each element plays a different role, their functions are synergistic.

Solomonseal as the Emperor, Solomonseal polysaccharides and Flavonoids as active ingredients, has anti-aging; has Hypolipidemic effect; also has enhanced immune function and many other effects.

Hawthorn flavone, Hawthorn's active ingredient, as a minister, The effect of hawthorn for lowering blood lipids is to lower the blood cholesterol by inhibiting the synthesis of liver cholesterol and promoting the liver to absorb plasma cholesterol.

Panax notoginseng saponins (PTS), Sanchi's active ingredient, as an adjuvant, mainly for promoting blood circulation and removing blood stasis.

Salvianolic acid A/ B, Danshen's active ingredient, as an adjuvant, prevention and supports of atherosclerosis.

Glossy privet fruit, as an adjuvant, Nourish liver and kidney, make you body feel healthy.
